

Welcome will soon allow data store creation, import of data, and guest mode where data stores do not get registered.

Networking will be implemented in a future version for decentralized or similar-to-RAID functionality to help secure data against loss.

Next Releases:  
Invoices  
Tasks  
Cases  
Reports

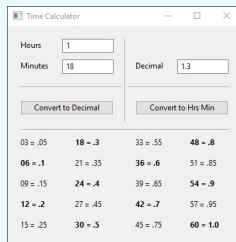

Later Releases:  
Courts  
Contacts

Simple Timer will save to your docs folder, as TXT & in SQLite database.

Time Calculator allows conversion if you are using another system to bill for work hours.

Settings will be further expanded in functionality so that individual systems can be customized for the needs of users.

Goal is to have a full commercial product available by June 2024 & a long term support version in July.
